# BULBS AND PLANTS FOR FALL PLANTING

**HOLM & OLSON, INC.**  
S T . P A U L :: M I N N E S O T A

## The Bulb Situation and the War

Our Bulb Catalogue this year has been reduced and is late, owing to the uncertainties in the bulb situation. Most all bulbs are grown in Holland. Holland is situated in the midst of the war zone. Shipping was stopped from that country last February, but we are in receipt of a cablegram August 25th, from our growers, stating our bulbs were shipped; hence we are assured of same unless overtaken by a U-Boat.

### Order Promptly

On receipt of this price list you should order your bulbs and Perennials **at once**. Perennials should be planted in this latitude in September, if possible, that they make root growth before cold weather, bulbs for outside planting by October 15th.

Trees and shrubs are shipped after October 1st, when they are matured and can be shipped and planted until the ground freezes.

## The Park Nurseries

Every patron living out of the city should arrange, when visiting St. Paul or Minneapolis, to visit the Nurseries. It will be an education. You can learn more of the "H. & O. Quality" in one hour than it is possible for us to convey to you in books. Throughout the city you can see the living pictures that we have used to illustrate our work.

**To Reach the Nurseries:** From any down-town point take the St. Clair-Hope Street Car. This line takes you within two blocks of the Nurseries. Coming from Minneapolis, take Selby-Lake Car, change at Snelling cross-town line to Grand Avenue Car; get off at Lexington and walk south to St. Clair. If motoring, take Summit Avenue to Lexington Boulevard, and south to St. Clair. Our Superintendent is always on hand, willing to explain everything to you.

## Beautifying Your Grounds

Our Landscape Men cover the entire Northwest. We do not solicit orders, and have no agents; we offer our patrons **Service**. We will design your grounds, advise you how they should be treated, and furnish you a plan that you can work out. It is not necessary to do it all at one time, but when finished you have something of beauty, and that will harmonize with your home. When necessary, we furnish men to superintend the planting so that everything is placed properly, and is planted properly. Hence you see the service is complete. We design, plan, furnish the material, and superintend the planting. No other firm in the West can furnish you this service.

## Collections for Tulip-Beds

The arrangement of the following beds will give very striking results. The beds are 6 feet in diameter and require 156 bulbs, planted 5 inches apart each way. These combinations can be changed, if desired.

### Bed A

1. 39 Artus
2. 39 La Reine
3. 39 Chrysolora
4. 39 Cottage Maid

\$2.25

### Bed B

1. 54 Chrysolora
2. 48 Artus
3. 54 La Reine

\$2.25

### Bed C

1. 80 Chrysolora
2. 76 Artus

\$2.25

These collections must be sent by express or freight, charges not prepaid.

Baron Van Thuyll Grande Blanche La Grandesse Lady Derby

## QUALITY HYACINTHS

**Culture Outdoors.** Plant the bulbs 6 inches deep, very uniformly, that they may come into bloom at the same time. A good method is to remove about 4 inches of the soil, level the bed carefully and plant the bulbs 6 inches apart each way, pressing the earth firmly and evenly over the bulbs.

**Culture in Glasses.** Special glasses are manufactured for the culture of Hyacinths, the bulb fitting in the top. These glasses should be filled with fresh water, also some gravel, and if at hand, some charcoal.

**Culture in Pots.** Hyacinths are grown successfully by planting in pots. Use good, rich soil, with plenty of manure. Place some pieces of broken pots in the bottom for drainage, and use 4- or 5-inch pots. Firm the bulb well in the soil, allowing the top of it to stand just a little above the soil. If flowers are wanted for Christmas, the bulbs should be planted in September.

## French Roman Hyacinths

**White.** Largest size. Splendid for indoor blooming and easily grown. 10 cts. each, 75 cts. per doz., \$6.50 per 100.

**Hyacinth Glasses.** Glasses for holding single bulbs, 50 cts. each. If by parcel post add 10 cts.; by express at purchaser's expense.

Pink Beauty

Imperator rubrorum

Keizerkroon

## SELECTED EARLY TULIPS

The length of the flower-stem is indicated by figures; the time of blooming by letters (E, early; L, late), so that you can select varieties of the same height and time of blooming.

**Culture Outdoors.** Any good garden soil, prepared by spading to a depth of 12 inches, is suitable. Plant the bulbs 5 inches apart and about 4 inches deep. The soil must be equally placed over the bulbs, so they will come up at the same time. Firm the earth well about the bulbs and mulch the beds during the winter.

**Culture in Pots.** Place six to eight bulbs in a 6-inch pot; set in the dark for a time. If you have a number of pots, take them from the dark room at intervals, so they bloom at different times.

Darwin Tulips, Madame Krelage

## DARWIN TULIPS

A distinct type of Single Late Tulips, with immense bowl-shaped flowers of well-rounded form, growing on tall, thick stems from 2 to 3 feet in height. The very brilliant colors, ranging from almost pure white through all the shades of pink and purple to a most intense red, together with the long stems, make them unsurpassed for cutting.

This type is admirably suited for planting in borders of shrubs and perennials. The blooms give life and color to any garden. The varieties offered are the best of the type, selected from a large list, and give all the different colorings.

	Doz.	100		Doz.	100
<b>Anton Roozen.</b> 24 L. Vivid rose pink.....	\$0 50	\$3 00	<b>Mr. Farncombe Sanders.</b> 25 L. Dark crimson.....	\$0 60	4 00

<b>Massachusetts.</b> 25 L. Vivid pink; white center.....	40	3 00			

## DOUBLE TULIPS

The Double Tulips are used for both bedding and forcing. Their large peony-like blossoms are highly ornamental, coming into bloom a little later than the single sorts, and lasting considerably longer in flower. They make their best display when planted in groups and beds, but are not so highly colored as the single sorts.

Add 5 cts. per dozen for postage, if to be sent by mail.

## SELECTED CROCUS

Can be planted in the grass or as a border for beds of perennials or around the edge of beds of other bulbs. When planted in sheltered locations they flower in March. They can be planted anywhere in the lawn, and after blooming the tops can be cut with a lawn-mower without injuring the bulbs.

Our selection is the best; the extra-large, well-selected bulbs will produce large flowers of all shades of white, yellow, and blue.

	Doz.	100		Doz.	100

## CHIONODOXA (Glory-of-the-Snow)

Flowers of beautiful azure-blue, with pure whitecenters. 30 cts. per doz., \$2 per 100.

## CROWN IMPERIALS

Red, Yellow and Orange. 20 cts. each, \$2 per doz.

## FRITILLARIAS

Lily-like in growth and very effective as a potplant. 30 cts. per doz., postpaid; \$2 per 100.

## FREESIA

Valuable on account of the beauty of the flowers, fragrance, and freedom of bloom.

**California-grown**. 15 cts. per doz., \$1 per 100.

## IXIAS

**Ixias, Mixed**. For indoor culture. 15 cts. per doz., \$1.25 per 100.

## OXALIS

These lovely flowers are among the most popular and can be used in many ways.

**Cernua lutea** (Buttercup). Yellow. 30 cts. per doz., \$2 per 100.

**Bulb Fiber** The growing of bulbs indoors gives one much pleasure during the winter months, and best of all, gives you blossoms that will remain for a long season, or that can be cut for any purpose. When growing bulbs in this manner it is wise to give them the best condition that can be made for their growth so that they will produce the best possible flowers. BULB FIBER is the material that does the work; it is clean, odorless, holds moisture, and contains plant-food such as the bulbs need. Quart. 10 cts.; 4 qts. 35 cts.; pk. 65 cts.; bus. \$1.50.

Double Von Sion

Emperor and Empress

Poeticus (Pheasant's Eye)

## SELECTED NARCISSI (The Spring Daffodil)

The Narcissi are among spring's earliest flowers, and there is no reason why we should not partake of the pleasures they bring with the first warm days of spring. The Narcissi grow in almost any location, doing well in sunny or shady places, and it matters not if wet or dry. They continue to bloom year after year, increasing in size and effectiveness. They are valuable to place in the border of perennials or shrubbery, where they can be left undisturbed, and for naturalizing in the grass. For forcing, treat the same as tulips, planting them in pots. The flowers assume many forms, and present charming combinations of white, gold, orange, sulphur, and pure yellow.

### DOUBLE NARCISSI

	Each	Doz.	100		Each	Doz.	100

## JONQUILS

A species of Narcissi, with fragrant, bright yellow flowers, which are borne in great abundance. Suitable for house and garden culture. Requires the same treatment as Narcissi. Perfectly hardy.

	Each	Doz.	100
Jonquil, Single. Yellow.	\$0 03	\$0 25	\$1 50
Jonquil, Double. Yellow.	05	50	3 00

Add 10 cts. per dozen for postage

## CHINESE SACRED LILY

The bulbs grow nicely in pots of soil, but the quickest way to get them into bloom is to set them in a bowl of water with a few pebbles to hold them in place. Each bulb sends up from five to ten flower-stems, producing great clusters of large, pure white, wax-like blossoms with yellow centers and delicious fragrance. Some blooms are single, others double but all equally beautiful. Our bulbs come direct to us from China.

	Each	Doz.
Extra-size bulbs.....	\$ 20	\$2 00

Add 20 cts. per dozen for postage, if wanted by mail

## SELECTED LILIES

No herbaceous border, shrubby border or garden is complete without these charming flowers. For beauty of color and magnificence of form the Lily stands above most other flowers.

### Order by Number

If to be sent by parcel post, add 15 cts. for postage on Nos. 1, 2, and 3, and 25 cts. on Nos. 4 and 5

The charm of the old-fashioned garden can be created only by the use of hardy perennials

## HARDY PERENNIALS

Usually fall is a good season for setting out these plants, but they should be mulched and planted early rather than late in the season.

Peonies and Irises are best planted in September. They will bloom the following spring.

The prices for Perennials vary somewhat, but all varieties not marked with a star are as follows:

1-yr., 20 cts. each, \$2.00 per doz.; 2-yrs., strong, 30 cts. each, \$3.00 per doz.

Varities marked with star, 1-yr., 30 cts. each, \$3.00 per doz.; 2-yrs., 50 cts. each, \$5 per doz.

NOTE.—While we grow the very finest Perennials, and agree to deliver them in good condition, they are sold with the understanding that should any fail to grow it is the purchaser's loss. Owing to the low prices at which they are sold, we cannot guarantee them to grow, and all orders are accepted on these conditions.

### Lectures

We are frequently requested to give talks before clubs, societies, etc., on different phases of Landscape Gardening. We have Landscape Architects who are schooled in this work, having lantern-slides covering the arrangement of grounds, illustrating beautiful effects, showing the before and after results. Write us as far in advance as possible for date, telling us character of meetings and about what you desire. We have hundredsof slides to choose from.

HOLM & OLSON, Inc.,  
Landscape Architects.

### GERMAN IRIS

See "Creating Your Landscape" for instruction how to plant, and descriptions of varieties in full.

## VELVET-SOD LAWN SEED

One of the most essential parts of the country place and suburban home is a properly made and well-kept lawn. We have made careful study of the grasses required for best results, and the formulas of our various grass mixtures are based upon these experiments.

The days of laboriously making lawns from sod are rapidly passing away. Good lawns are now made from *good grass seed*—the essentials are a careful blending of varieties adapted to producing a thick turf with velvety appearance. Each variety in this composition has a special purpose; some make strong, fibrous roots, that take hold on the earth and hold it in position; others, of a creeping nature, quickly fill up the vacant spots; yet other sorts are used for their color value, besides kinds that are able to withstand heavy or excessive rains. Our Velvet-Sod Mixture is composed of the best, strictly pure seeds of hardy lawn grasses from America and Europe. It quickly produces a permanent lawn of rich green and luxuriant growth. If you need grass seed for only a small city yard, or a large lawn of acres, use this mixture.

**QUANTITY OF SEED TO SOW.**—One pound of our lawn grass seed will sow 10x20 feet, or 200 square feet. This is heavier than recommended by many seedsmen, but practical experience in making lawns in our landscape department has taught us to use sufficient seed, and the best that can be obtained.

NOTE. Write for our booklet "The Essential Principles of Lawn Making."

### VELVET-SOD MIXTURE

Our Velvet-Sod Mixture will make a close, thick turf in a very few weeks, which maintains its beautiful, rich green the entire season. We know our mixture to be among the best on the market, and we ask our patrons to carefully consider this before placing their order. The weight of this mixture shows its extra-high quality, and it is entirely free from chaff. Our experience as landscape gardeners has taught us the best Lawn Grass Mixture for parks, cemeteries and private grounds. Lb. 35 cts., 5 lbs. \$1.75, 10 lbs. \$3.25, bus. (20 lbs.) \$6.

### CAPITAL CITY MIXTURE

This mixture is admirably adapted to all uses, but the quality of the seed is not so high as our Velvet-Sod Mixture; but, for ordinary sowing, will answer the same purpose. Lb. 30 cts., 5 lbs. \$1.50, 10 lbs. \$2.75, bus. (20 lbs.) \$5.

### SHADY-SIDE MIXTURE

This will produce quickly an abundant and even growth of beautiful green grass. The grasses used in making this special mixture are only those that are well adapted to growing in the shade. Lb. 40 cts., 5 lbs. \$2.00, 10 lbs. \$3.75, bus. (20 lbs.) \$7.

### GOLF-LINK MIXTURE

This mixture is composed of grasses best suited for golf-links, and is the result of careful experi-

ments, as well as careful watching for several years of practical results on golf-links sown with our seed. Lb. 35c., 5 lbs. \$1.75, 10 lbs. \$3.25, bus. (20 lbs.) \$6.

### PUTTING-GREEN MIXTURE

The hardiest and finest low-growing grasses are contained in this mixture. It produces a beautiful and lasting green turf calculated to withstand hard tear and wear. Lb. 50 cts., 5 lbs. \$2, bus. (20 lbs.) \$8.

### TERRACE MIXTURE

A special mixture of grasses for sowing on terraces and hillsides, producing spreading roots, thus preventing heavy rains from washing out. Lb. 35 cts., 5 lbs. \$1.75, 10 lbs. \$3.25, bus. (20 lbs.) \$6.

### WHITE CLOVER

The best variety for lawns, as it forms a close herbage and remains green throughout the season. Sow in spring at the rate of six pounds to the acre when sown alone; half the quantity when sown with other grasses. ½lb. 40 cts., lb. 70 cts., 5 lbs. \$3.25.

### KENTUCKY BLUE GRASS

Especially suited to meadows and rich lands. It is the grass of the famous limestone soils of Kentucky, and is no less a favorite all through the northern states. A perfect lawn grass. Lb. 30 cts., 5 lbs. \$1.50, 10 lbs. \$2.50, bus. (20 lbs.) \$4.50.
